

*Great opportunity for talented web developer to
support clean technology experts*

Web Developer - PHP

- **Clean technology company - South East location**
- **12 months fixed term contract**

Ceramic Fuel Cells Limited is a leading developer of high efficiency and low emission electricity generation units for homes and other buildings. Founded in 1992, CFCL is listed on both the Australian Stock Exchange and the London Stock Exchange AIM Market.

Our talented team is very dedicated and passionate about what we do. We are seeking a like-minded individual who is ready to hit the ground running in a very supportive team based environment.

This is a challenging fixed term contract opportunity for an experienced web developer to join our Software Engineering Team. The successful candidate will primarily be responsible for designing, supporting and maintaining the CFCL user website and internal suite of tools including: alarm handling, graphing, utilities and logging interfaces.

Key duties will include writing programs to develop functioning websites, development and execution of specifications for web interface programs, interpreting customer service specifications, implementing and testing design concepts and improvements and troubleshooting computer/network/server/database problems. You will also assist support engineers in developing further specifications on website functionality.

Ideally the successful candidate will demonstrate the following skills and experience:

- Tertiary qualification in computer science
- Sound experience in website development, support and maintenance
- Demonstrated skills in Linux, Apache and MySQL and PHP
- Preferably skills in JQuery, HTML, CSS, Javascript and AJAX
- Experience with REST servers will be highly regarded

A team player, you are an innovative thinker with strong problem solving and interpersonal skills.

CFCL is an Equal Opportunity Employer and seeks to attract and retain the highest calibre of professional.
